AHSAN GULZAR

(+92) 3166941458 | ahsangulzar009@gmail.com | www.linkedin.com/in/ahsan-gulzar | www.github.com/ahsanbhutta01 | Portfolio

Results-focused Full-Stack Web Engineer with hands-on experience building scalable, high-performance using **React, Next.js, Node.js, Express.js, MongoDB.** Proven ability to design efficient backend systems, optimize frontend performance, and deliver user-centric interfaces. Experienced in transforming complex requirements into reliable, maintainable web solutions through clean code and modern development practices.

EDUCATION

Bachelor of Science in Information Technology | Quaid-I-Azam University, Islamabad.
2021 – 2025

- Completed coursework in Programming, OOP, DSA, Databases, Machine Learning, Networking, and DevOps, Web Engineering with a **CGPA of 2.9/4.0.**
- Projects: Student Grading System, Financial Advisor for crypto Traders to get better suggestions for investing.

PROFESSIONAL EXPERIENCE

Financial Advisor Platform (Final Year Project) | Academic Project
November 2024 – October 2025

Tech Stack: React, Redux, Node.js, Express, MongoDB, Docker, GitHub Actions, DeepSeek API, CoinGecko API

- Developed a full-stack financial advisor web application that analyzes user inputs such as **investment, amount, risk tolerance and trade-type (Spot/Future)** to generate personalized investment suggestions.
- Integrated **real-time cryptocurrency market data** using the **CoinGecko API** to ensure up-to-date pricing and trends.
- Designed an **AI-assisted recommendation workflow** that generates optimized prompts for external AI tools to enhance investment insights.
- Developed **RESTful backend services** with scalable business logic and data validation.
- Create a **responsive frontend** using **React and Redux** for efficient state management.
- **Containerized the application with Docker** and implemented **CI/CD pipelines using GitHub Actions** to automate build and deployment.

Web Developer | Freelance | Remote
2024 - Present

- Developed and maintained **full-stack web applications** for small clients and personal initiatives using **React, Next.js, Node.js, Express, and MongoDB**.
- Built **responsive and performance-optimized user interfaces** following modern UI/UX practices.
- Integrated **AI-powered APIs** to add intelligent features such as **automated content generation and data summarization.**
- Utilized AI tools to **enhance development workflows**, including prompt-based feature prototyping and logic optimization.
- Communicate with clients to gather requirements and deliver functional, user-focused solutions.

PROJECTS

B-Docs – Real Time Collaborative Document| Personal Full-Stack Project
April 2025

Live Demo: B-Docx
Tech Stack: Next.js (TypeScript), TipTap Editor, Liveblocks, Clerk, Convex Database, Tailwind CSS, Shadcn UI

- Built a **real-time collaborative document editor** like Google Docs with live cursors, comments, and multi-user editing.
- Implemented **workspace and organization-based access control** with full authentication using **Clerk**.
- Integrated **real-time presence and collaboration** features using **Liveblocks**.
- Developed rich-text editing capabilities with **TipTap Editor**, including templates and document exports.
- Designed a **responsive and modern UI** using **Tailwind CSS**, optimized for fast interactions and smooth user experience.

Private Chat – Self-Destructing Real-Time Chat App | Personal Full-Stack Project
December-2025

Live Demo: Private-Chat
Tech Stack: Next.js (React 19), TypeScript, Upstash Redis database, Elysia.js, TanStack Query, Tailwind CSS

- Built a **privacy-first real-time chat app** with **self-destructing rooms** and zero message retention.
- Implemented real-time messaging and typing indicators using Upstash Realtime, ensuring low-latency communication.
- Designed **anonymous session management** with secure, one-click room creation and sharing.
- Implemented a **countdown-based room lifecycle** with manual and automatic destruction controls.
- Delivered a **responsive, performance-optimized UI** using Tailwind CSS.

Company Reviews System | Personal Full-Stack Project
October 2025

Live Demo: Company-Review-System
Tech Stack: Next.js 15, TypeScript, Node.js, Express, MongoDB, Tailwind CSS, shadcn/ui

- Built a **full-stack company reviews platform** allowing users to post, view, and rate reviews in real-time.
- Developed a **fast, SEO-friendly frontend** using Next.js 15 and TypeScript.
- Implemented **RESTful backend APIs** with Node.js, Express, and MongoDB for secure and scalable data handling.
- Designed a **responsive, modern UI** with Tailwind CSS and shadcn/ui components.
- Deployed the application to **production**, ensuring smooth performance and user experience.

TECHNICAL SKILLS

Programming & Tools: JavaScript, TypeScript, React.js, Node.js, Express.js, Next.js, MongoDB, API Development, Redux, Zustand, TailwindCSS, Shadcn/UI.

DevOps & Deployment: Docker, Git/GitHub, CI/CD (GitHub Actions)

AI & ML: OpenAI API, OpenRouter API, GroqAI API

Other Tools / Productivity: Postman, Thunder Client, VS Code.
