|  [Portfolio](#)

Results-focused Full-Stack Web Engineer with hands-on experience building scalable, high-performance using **ReactJS, NextJS, NodeJS, ExpressJS, HonoJS, PostgreSQL, MongoDB, Redis Nest.js, GraphQL, RESTful API**. Proven ability to design efficient backend systems, optimize frontend performance, and deliver user-centric interfaces. Experienced in transforming complex requirements into reliable, maintainable web solutions through clean code and modern development practices.

EDUCATION

Bachelor of Science in Information Technology | Quaid-I-Azam University, Islamabad. (2021 – 2025)

- Completed coursework in Programming, OOP, DSA, Databases, and DevOps, Web Engineering with a **CGPA of 2.9/4.0**.
- **Projects:** Student Grading System, Financial Advisor for crypto Traders to get better suggestions for investing.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Venofox (May 2026 – Present)

Live Demo:  [Venofox](#)

Tech Stack: Next.js, TypeScript, Hono.js, Zod, Prisma ORM, PostgreSQL, REST APIs

- Built and maintained scalable full-stack applications using **Next.js and TypeScript** that are actively used in production
- Designed and developed backend APIs using **Hono.js** with clean, modular structure to **handle real business logic**
- Established **end-to-end type safety across frontend-backend boundaries**, reducing integration bugs and improving developer experience
- Handled database schema design and migrations using **Prisma ORM and PostgreSQL** to keep data models organized
- Took part in code reviews, gave feedback to teammates, and improved my own code based on feedback received

Full-Stack Developer Intern | Venofox (February 2026 – May 2026)

Tech Stack: Next.js, TypeScript, Hono.js, Zod, Prisma ORM, PostgreSQL, REST APIs

- Jumped into a live production codebase and started contributing full-stack features using **Next.js and TypeScript** within the first few weeks
- Built REST API endpoints and took part in backend development discussions with the core team
- Found and fixed UI performance issues that improved the overall speed and feel of the application
- Helped improve existing features based on user feedback and suggestions from senior developers
- Grew quickly within the role and took on more responsibility, which led to a full-time promotion after just 3 months

Web Developer | Freelance | Remote (2024 – Present)

- Developed and maintained **full-stack web applications** for small clients and personal initiatives using **React, Next.js, Node.js, Express, and MongoDB**.
- Built **responsive and performance-optimized user interfaces** following modern UI/UX practices.
- Integrated **AI-powered APIs** to add intelligent features such as **automated content generation and data summarization**.
- Utilized AI tools to **enhance development workflows**, including prompt-based feature prototyping and logic optimization
- Communicate with clients to gather requirements and deliver functional, user-focused solutions.

PROJECTS

Financial Advisor Platform (Final Year Project) | Academic Project (November 2024 – October 2025)

Tech Stack: React, Redux, Node.js, Express, MongoDB, Docker, GitHub Actions, DeepSeek API, CoinGecko API

- Developed a full-stack financial advisor web application that analyzes user inputs such as **investment, amount, risk tolerance and trade-type (Spot/Future)** to generate personalized investment suggestions.
- Integrated **real-time cryptocurrency market** data using the **CoinGecko API** to ensure up-to-date pricing and trends.
- Designed an **AI-assisted recommendation workflow** that generates optimized prompts for external AI tools to enhance investment insights.
- Developed **RESTful backend services** with scalable business logic and data validation.
- Create a **responsive frontend** using **React and Redux** for efficient state management.
- **Containerized the application with Docker** and implemented **CI/CD pipelines using GitHub Actions** to automate build and deployment

B-Docs—RealTimeCollaborative Document | Personal Full-Stack Project (April 2025)

Live Demo: [🔗 B-Docx](#)

Tech Stack: NextJs, Typescript, TipTap Editor, Liveblocks, Clerk, Convex Database, Tailwind CSS, Shadcn UI

- Built a **real-time collaborative document editor** like Google Docs with live cursors, comments, and multi-user editing.
- Implemented **workspace and organization-based access control** with full authentication using Clerk.
- Integrated **real-time presence and collaboration** features using **Liveblocks**.
- Developed rich-text editing capabilities with **TipTap Editor**, including templates and document exports.
- Designed a **responsive and modern UI** using **Tailwind CSS**, optimized for fast interactions and smooth user experience

Company Reviews System | Personal Full-Stack Project (October 2025)

Live Demo: [🔗 Company-Review-System](#)

Tech Stack: NextJs, Typescript, TipTap Editor, Liveblocks, Clerk, Convex Database, Tailwind CSS, Shadcn UI

- Built a **full-stack company reviews platform** allowing users to post, view, and rate reviews in real-time.
- Developed a **fast, SEO-friendly frontend** using **Next.js 15 and TypeScript**.
- Implemented **RESTful backend APIs** with **Node.js, Express, and MongoDB** for secure and scalable data handling.
- Designed a **responsive, modern UI** with **Tailwind CSS and shadcn/ui** components.
- Deployed the application to **production**, ensuring smooth performance and user experience.

Private Chat – Self-Destructing Real-Time Chat App | Personal Full-Stack Project (December-2025)

Live Demo: [🔗 Private-Chat](#)

Tech Stack: NextJS, React19, TypeScript, Upstash Redis database, Elysia.js, TanStack Query, Tailwind CSS

- Built a **privacy-first real-time chat app** with **self-destructing rooms** and zero message retention.
 - Implemented **real-time messaging and typing indicators** using **Upstash Realtime**, ensuring low-latency communication.
 - Designed **anonymous session management** with secure, one-click room creation and sharing.
 - Implemented a **countdown-based room lifecycle** with manual and automatic destruction controls.
 - Delivered a **responsive, performance-optimized UI** using **Tailwind CSS**.
-

TECHNICAL SKILLS

Programming&Tools:

- JavaScript, TypeScript, ReactJS, NodeJS, ExpressJS, NextJS, NestJS, HonoJS, MongoDB, PostgreSQL, Redis, RESTful API, GraphQL, Zustand, Zod, TailwindCSS, Shadcn/UI.

DevOps & Deployment:

- OpenAI API, OpenRouter API, GroqAI API

Other Tools / Productivity:

- Postman, Thunder Client, VS Code.
-
