PROFESSIONAL SUMMARY

Full-Stack Web Engineer with 1+ years of experience building scalable web applications across e-commerce, SaaS, and enterprise domains. Delivered **3+** production-ready projects using React.js, Next.js, Node.js, PostgreSQL and MongoDB. Strong background in **CI/CD** pipelines, Agile workflows, and backend architecture.

WORK EXPERIENCE

Full-Stack Developer (Intern → Full-Time)

Venodev IT, Sialkot

February 2026 – Present

- Built and maintained a scalable full-stack application using Next.js and TypeScript, deployed in production environment with consistent uptime.
- Designed modular REST APIs using Hono.js with Zod validation, reducing integration bugs by **~35%** and improving type safety across the entire stack.
- Designed and managed normalized database schemas with Prisma ORM and PostgreSQL, optimizing query performance by **~25%** through indexing and schema restructuring.
- Promoted to full-time within **3 months** based on consistent delivery and increased responsibility

PROJECTS

Financial Advisor Platform – FYP | React.js, Node.js, MongoDB, Docker, DeepSeek API, CoinGecko API

- Built a full-stack AI-powered financial advisor using DeepSeek API that analyzes **3 key risk parameters (trade type, risk percentage, investment amount)** to generate personalized crypto. Integrated CoinGecko API for real-time market data.

Company Reviews System | Next.js, TypeScript, Node.js, MongoDB, TailwindCSS

- Built a full-stack company reviews platform with JWT-based authentication, supporting CRUD operations for reviews and ratings. Implemented server-side-pagination handling **1000+ reviews entries** efficiently.

Private Chat | Next.js, TypeScript, Upstash Redis, Elysia.js, TanStack Query

- Built a privacy-first real-time chat app with self-destructing rooms and zero message retention.
